4. First Aid measures:**General information:** Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.**After inhalation:** Supply fresh air and call for doctor for safety reasons. In case of unconsciousness bring patient into stable side position for transport.**After skin contact:** Instantly wash with water and soap and rinse thoroughly. If irritation develops, consult a physician.**After eye contact:** Rinse opened eye for almost 15th minutes under running water. If symptoms persist, consult a physician.**After ingestion:** If swallowed, dilute with water; do not induce vomiting. Get immediate medical attention.**5. Fire fighting measures:****Extinguishing media:** Use water fog, foam or dry chemical extinguishing media.**Special fire fighting procedure:** Fire fighting should be equipped with self-contained breathing apparatus and turnout gear.**Usual fire and explosion hazard:** Adequate ventilation and cleanup must be maintained to minimize dust accumulation. May form explosive dust-air mixture.**6. Accidental release measures:****Personal precautions:** Avoid contact with skin and eyes wearing protective clothing. Avoid inhalation of vapours or powders wearing protective masks**Environmental precautions:** Limit leakages with earth or sand. If the product has escaped into the drainage system or it has contaminated the ground or vegetation, notify the competent authorities.**Methods for cleaning up:** Recover the product for re-use if possible, or for elimination. The product might, where appropriate, be absorbed by inert material. After the product has been recovered, rinse the area and materials involved with water.**7. Handling and storage:****Handling:** Use protective clothing as gloves, coveralls apron, boots; necessary to prevent skin contact. Do not drink or eat or smoke while working.**Incompatible material:** None in particular**Storage:** Use local exhaust to control dusting. . Store at 5-40°C**8. Exposure controls and personal protection:****Respiratory protection:** Approved protective.**Hands protection:** Use protective clothing. Do not drink or eat or smoke while working.**Eye protection:** Chemical safety goggles or glasses.**Body protection:** Appropriate protective clothing.**Other protective equipment:** Showers and eye – washers in working area are recommended**General precaution:** Good local exhaust ventilation. Avoid long-term exposure, even to small quantities.**Specific hygiene measures:** Washing/ Showering facilities with a non-solvent based skin cleaner, hot water and soap must be provided and used. Overalls should be changed frequently and dry cleaned. Grossly contaminated clothing should be changed immediately and should not be taken home. The condition of gloves should be checked before use for signs of internal contamination.**Incompatible material:** Adequate ventilation and cleanup must be maintained to minimize dust accumulation. May form toxic or explosive fumes / steams.**8.1 Exposure limit values**
